## 1. Setting up the Autorité des marchés publics — Practical consequences on the call for tenders process in Quebec

The Autorité des marchés financiers is now replaced by the AMP for the authorization to contract with a public body.

This new body, which is responsible for overseeing all public contracts, also has the power to audit, investigate, order and recommend.

## 2. The latest news in the infrastructure market

Among the highlights from the last few months:

- The production of more than 2.305 GW of renewable energy, confirmed in new contracts
- 3 major transportation projects are progressing rapidly in North America
- The Olympic Stadium Roof Rehabilitation Project is moving forward
- The PPP model is considered for the implementation of 2 new transportation projects
- A major bank ceases to finance coal, oil and gas energy projects
